Red Lion Automation Series

## ▶▶▶ Temperature/Process Controllers

Red Lion's versatile PXU Series controllers are ideal for a variety of industrial applications - from simple on/off to full PID control and more.

Our PXU PID controllers offer many unique features including universal inputs 1/16, 1/8 and 1/4 DIN models, as well as one of the largest dual line displays in the industry. Other features include on-demand auto tuning, two control outputs for reverse or direct application and easy setup with Crimson 2.1 software. Options include ramp/soak capability, enabling users to change and hold temperature and process variables for specific time periods, easily integrating into time-stepped processes. Other options include a second analog input, second analog output as well as a current transducer (CT) input.

As one of the most complete PID controller lines in the industry, the PXU Series is an ideal choice for machine builders and process engineers alike.
