

Pressure transmitter with flameproof enclosure

For applications in explosion-protected areas

Models E-10 and E-11

WIKA data sheet PE 81.27

for further approvals
see page 6

Applications

- Borehole monitoring
- Refineries and petrochemical industry
- Drilling platforms and pipelines
- Gas compressors

Special features

- CSA and FM approved as “explosionproof” for class I, div. 1 hazardous areas
- ATEX and IECEx approved as “flameproof enclosure” for II 2G Ex db IIC T6...T1 Gb
- Current or voltage output
- Designed for harsh ambient conditions
- Low-power version available as an option

Description

The model E-10 and E-11 flameproof pressure transmitters have been designed specifically for the high demands of industrial oil and gas applications.

These pressure transmitters can be delivered with various analogue signals from 4 ... 20 mA to a low-power version with DC 1 ... 5 V.

They feature an exceptionally high resistance to vibration, pressure spikes and moisture ingress. Furthermore, these pressure transmitters fulfil IP67 (NEMA 4x) ingress protection.

On each individual instrument a comprehensive quality control and calibration is performed, so that an accuracy

of $\leq 0.5\%$ can be ensured. Temperature compensation guarantees accuracy and long-term stability, even with strong fluctuations in the ambient temperature.

The models E-10 and E-11 are suitable for sour gas applications and feature particularly high resistance against sulphide stress cracking when in contact with sulphurous gases.

The pressure transmitters are approved as “explosionproof” for class I, II, III, div. 1 hazardous areas to FM and CSA as well as “flameproof” for II 2G Ex db IIC T6...T1 Gb to ATEX and IECEx.

Materials

Wetted parts

- Stainless steel (additionally Elgiloy® for model E-10 with measuring range > 0 ... 25 bar, NACE-compliant)
 - For sealing materials see “Process connections”
- Where the medium is hydrogen, contact the manufacturer.

Non-wetted parts

Case from stainless steel
For cable see “Electrical connections”

Internal pressure transmission medium

Synthetic oil (no pressure transmission medium for model E-10 with measuring range > 0 ... 25 bar)

For other materials see WIKA diaphragm seal programme
